

A Ranking Master Class webinar for Algerian universities

Insights into the role of Scopus data in THE's World University Rankings and Impact Rankings

The aim of this webinar is to provide insights into the role of Scopus data in fueling THE's World University Rankings and Impact Rankings. By understanding the inner workings of rankings including the data and analytics that inform them and related processes, universities will have a better understanding of factors influencing their ranking performance.

The session will cover the following relevant topics:

- 1. Introduction - The significance of university rankings**
Prof Hafid Aourag, Director General - Scientific Research and Technological Development (DGRSDT)
- 2. An overview of THE World University Ranking & Impact Ranking methodology, its key research indicators and processes**
Phil Baty, Chief Knowledge Officer - Times Higher Education
- 3. How Scopus data fuels THE's WUR and Impact Ranking; the significance of affiliation accuracy and citations for rankings**
Roy Boverhof, Manager Data Analytics – Elsevier
- 4. Performance of Algerian universities THE WUR and Impact Rankings**
 - Phil Baty, Chief Knowledge Officer – Times Higher Education*
 - Lucia Schoombee, Sr. Consultant Research Intelligence - Elsevier*
- 5. Discussion / Q&A**
